1. Scope and objective of this deliverable

The objective of this document is to report the communication and dissemination activities done through social networks in order to:

- communicate the progress and events of the NET UBIEP project,
- inform the audience of the benefits of the use of BIM in energy efficiency and
- disseminate the results of the project and their potential impact on the construction sector.

This report summarizes the consortium's social media strategy and contains an analysis of the campaign's coverage, the frequency and intensity of the use of social media among the project partners.

The Social media activity represents an important part of the Net-Ubiep project's communication and dissemination plan, reported in **D6.1 Dissemination and exploitation strategy** and **D7.1 Communication strategy**.

In the first paragraphs the Net- Ubiep social media strategy will be described, together with the target audience; therefore we will proceed with the implementation of the social media strategy which also includes information about the Net-UBIEP social network guidelines; then an analytic report on the social media channels involved, for the international account and for any partner's country account, will follow.

2. The Net- Ubiep social media strategy and target audience

To promote the Net-UBIEP project and to reach the target audience as set in the project's goals (professionals, public administration, technicians, building owners and tenants) as well the stakeholders, the consortium has thought of a social media strategy based on two levels, local level and overall dissemination.

5

2.1. Local level social media communication

Since the project activities mainly involve local stakeholders, the consortium was convinced it is important to reach the target groups at a local level. Therefore, the partners are stimulated to use their proper social media channels to disseminate the net-UBIEP project activities as much as possible, utilizing the already existing reach of these social media channels. For example to inform the local community in their local language about upcoming or past events related to the project.

In the following Table 1 the social networks already used by the partners and their number of followers.

<i>Partner</i>	<i>Title and Periodicity</i>	<i>Number of People reached</i>
<i>CS Aziendale</i>	Linkedin	<i>4.400 followers</i>
<i>ENEA</i>	FB + Twitter + Linkedin	<i>6.500 followers</i>
<i>FLC</i>	Facebook	<i>5.600 followers</i>
<i>FLC</i>	Twitter	<i>9.351 followers</i>
<i>FLC</i>	LinkedIn	<i>3.665 followers</i>
<i>FLC</i>	Google+	<i>268 followers</i>
<i>ISSO</i>	Linkedin	<i>1.882 followers</i>
<i>ISSO</i>	Twitter	<i>1360 followers</i>
<i>"Skaitmeninė statyba"</i>	Facebook	<i>100 followers</i>
<i>"Skaitmeninė statyba"</i>	Linkedin	<i>50 followers</i>

Table 1: List of existing social media account and related number of followers for each partner

In some cases (Italy, Estonia, Croatia) partners decided to create social media accounts exclusively dedicated to the net-UBIEP project *while* others preferred to continue to use their own media accounts to maximize the dissemination.

The result of this strategy is that the local partners' social channels accounts act as multipliers of information of the project's website and the dedicated social media accounts.

6

2.2. Overall dissemination

In addition to the local dissemination carried out by the partners, it was decided to create an overall dissemination of project related information, activities, outcomes and results through social media at international level.

Dedicated profiles and pages have been created for the main social networks:

- Facebook
- Vimeo/Youtube
- LinkedIn
- Twitter

In the following pages, this aspect will be described in detail, and in the paragraph 4.1. the results of the social media campaign are reported.

3. Implementation of the social media strategy

3.1. Social networks activated in the context of the Net-ubiep Project

Dedicated social media accounts were created to which all partners were invited to connect. These social media accounts are directly connected to the project's website.

Figure 1 Net-ubiep web site home page showing link to social media

Figure 2: Net-Ubiep Project web site home page showing tweets

3.1.1. Facebook

Since Facebook is the most widely used form of social media in the net-UBIEP community, this social media channel was established as the main social media outlet.

A **Facebook page** (<https://www.facebook.com/netubiep/>) is directly accessible through the Net –ubiep project website by clicking over the icon.

In this way, every user when visiting the website has the possibility to link to the Facebook page and interact with the net- Ubiep community.

8

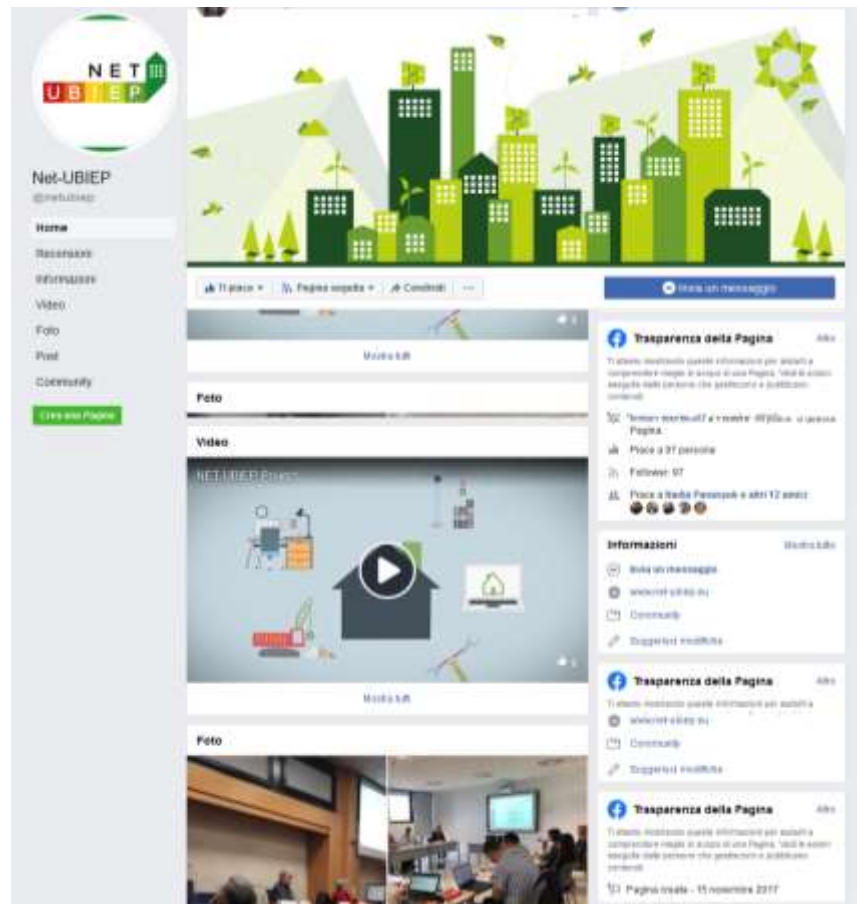

Figure 3. Official Facebook page @netubiep account

3.1.2. Twitter

A Twitter account has been set up at https://twitter.com/net_ubiep with tweets about the project including the @netubiep handle or the #net_ubiep hashtag where relevant. The Twitter account (@netubiep) is used as a direct communication instrument for reaching the general public and following

Horizon 2020 communication and dissemination campaigns launched by the European Commission.
All WP7 partners contributed in the Twitter communication activities.

3.1.3. LinkedIn

A Linked-in account (<https://www.linkedin.com/company/18585831/admin/...>) has been activated to reach stakeholders and target audience, to promote the project activities and group discussions.

3.1.4. You Tube

A Youtube account (https://www.youtube.com/channel/UCnsW_vpcDetopHsFo57PqdQ/featured) has been activated to upload video clip of the project, recorded lectures and seminars.

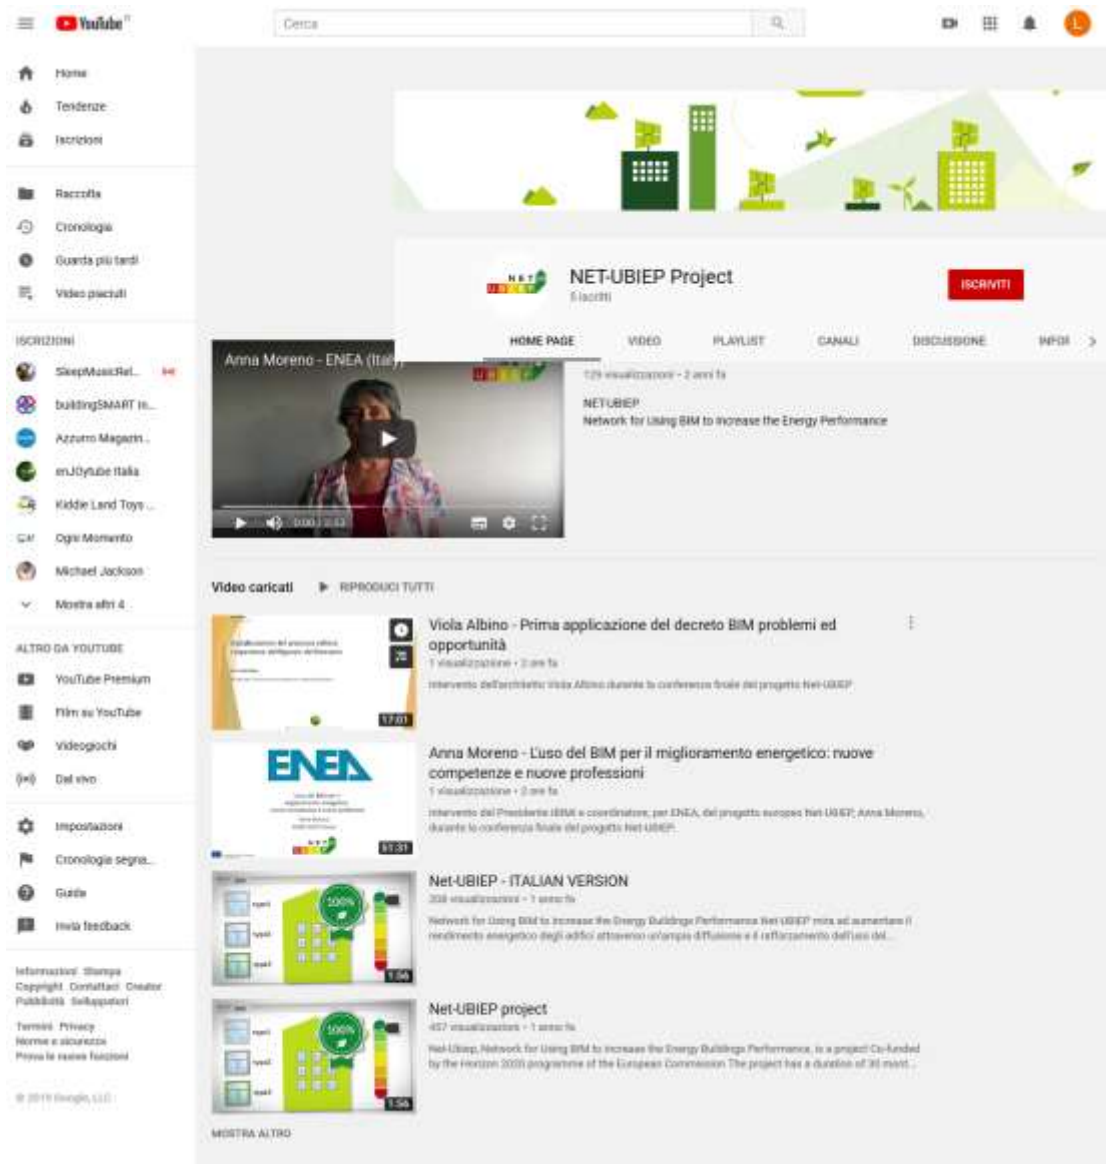

Figure 6: Official Net-UBIEP You Tube account

3.2. Social media accounts management

These project related social media accounts destined to the overall dissemination are managed by the Italian partners, ENEA and CSA, with contributions from all partners.

In concrete terms this means all partners are asked to send updates about local activities as well as relevant information for the newsletter, the website and social media to ENEA and CSA.

ENEA as WP7's leader and CSA's social media manager were responsible to oversee the project's social media activities, share with partners the social media guidelines, centralizing the information to be shared and communicated with the audience.

To reach the largest possible audience, each partner has identified professionals on a local level to manage either the national Net-ubiep social media accounts, where existing, or their proper social media channels.

12

3.3. National Net-ubiep social media accounts

The following table shows the national accounts of the Net-UBIEP project.

Project Account	Partner in charge	Language	Facebook	Twitter	Linkedin	You tube

3.4. Social media channels used by partners

In addition, each partner has committed themselves to post regularly on the project using their proper accounts, in order to reach the largest possible audience.

The following table resumes social media channels as used by the local partners.

3.5. Net-UBIEP social Network guidelines

The social media strategy included a preparation of a guide containing useful guidelines for the project's partner to follow in order to better organize the activity of communication and dissemination via social networks. The main goal of the guidelines is to implement additional communicative measures to maximize social media benefits.

The Social media guidelines addressed to the project partners included the following information and recommendations on which hashtags or handle to include, as explained below.

Specific guidelines for maximising social media benefits were sent round to all partners, and included recommendations on which hashtags to include.

Social media can be used for both communication and dissemination (both of which are mandatory for all Horizon 2020 projects).

The partners have been informed about the specific goals of each activities, and on the potential of social channels to perform both functions.

The main objectives are listed here:

<i>COMMUNICATION</i>	<i>DISSEMINATION</i>
Covers the whole project (including results);	Covers project results only
Starts at the outset of the project;	Happens only once results are available;
Multiple audiences : Beyond the project's own community, including the media and general public	Specialist audiences : Groups that may use the results in their own work, including peer groups, industry, professional organisations, policymakers ;
Multiplier effect. Informing and engaging with society, to show how it can benefit from research	Enabling the take-up and use of results

For boosting the visibility of the content and increasing the number of people who read the posts, to follow the guidelines underneath have been recommend:

- Tweet/post regularly: set up an agenda, e.g. one/twice a week
- Post high quality content related to the project
- Share information about project results and final products: scientific publications, events, conferences, training courses, videos, events, etc
- Use hashtags and handles (please, see the net-ubiep Hashtag suggestions below)
- Place a Facebook/Twitter/Linkedin logo on your website (if possible).
- Retweet / repost / share each others
- Reply to each others' tweets / posts
- Identify followers within your network
- Connect with other EU-funded projects and the European Commission social media channels: for example, by following their account, retweeting or replying to their posts or tagging them

In general, all partners already using social media account have been invited to retweet and share the project's posts and relevant content with the appropriate audiences.

Using specific hashtags , related to the project topics, has been suggested.

The partners agreed to add the following Hashtag to your tweets/posts:

#net_ubiep,

#netubiep_project,

#EnergyEfficiency,

#H2020,

#BIM

to added in front of any word or phrase in a post, making it easier for users to locate specific content or themes of Net-UBIEP topics.

The use of hashtags made the keyword or phrase in the post searchable, increasing outreach.

To send a direct reply to someone, or to link to someone else's account, to identify a person or a project's account has been encouraged the use of handle elsewhere in the post.

Using handles helped to ensure that the contents reaches the widest audience possible.

The Net-UBIEP twitter handle has been @netubiep, used to connect tweets with the project account.

Furthermore, project partners have been encouraged to add # H2020 and tagging @ EU_H2020 to the net-ubiep tweets, to maximise our visibility and be recognised as part of the H2020 community and connecting with other Horizon 2020 beneficiaries.

4. Analytic Report on social media channel

16

This section analyzes accesses, statistics, the target achieved, for each social channel used to disseminate the themes of the Net-UBIEP project, or themes related to BIM, energy efficiency, taking into account different approach:

- a) *for social network channels referring to the partner's company:*
are reported the most popular posts and highlight the relative coverage, users reached, shares, reposts etc ...
- b) *for national project social channel (were existing):*
are resumed from the relevant data analysis section the list of posts and their coverage, users reached, shares, repost etc ...

For all the social media account are reported, a national level, the following information/data:

- screenshot of the social media channels ;
- significant data (graphs and/or tables) highlighting the communication campaign done in the period from June 2018 to December 2019.
- report of the "five best posts" in terms of coverage and/or likes;
- short description analyzing the data and results

4.1 International social media account report

4.1.1. Facebook

International Facebook page was created and managed by the Italian partners specifically for the purposes of promoting activities and results of the Net-UBIEP project.

The Net-Ubiep Facebook page created community around BIM and NZEB and followed other Horizon 2020 projects related to similar topics like BIMEET, BIMCERT, BIMPLEMENT, and where every partners used to publish post about their activities in the relative country but relevant for the project at European level.

17

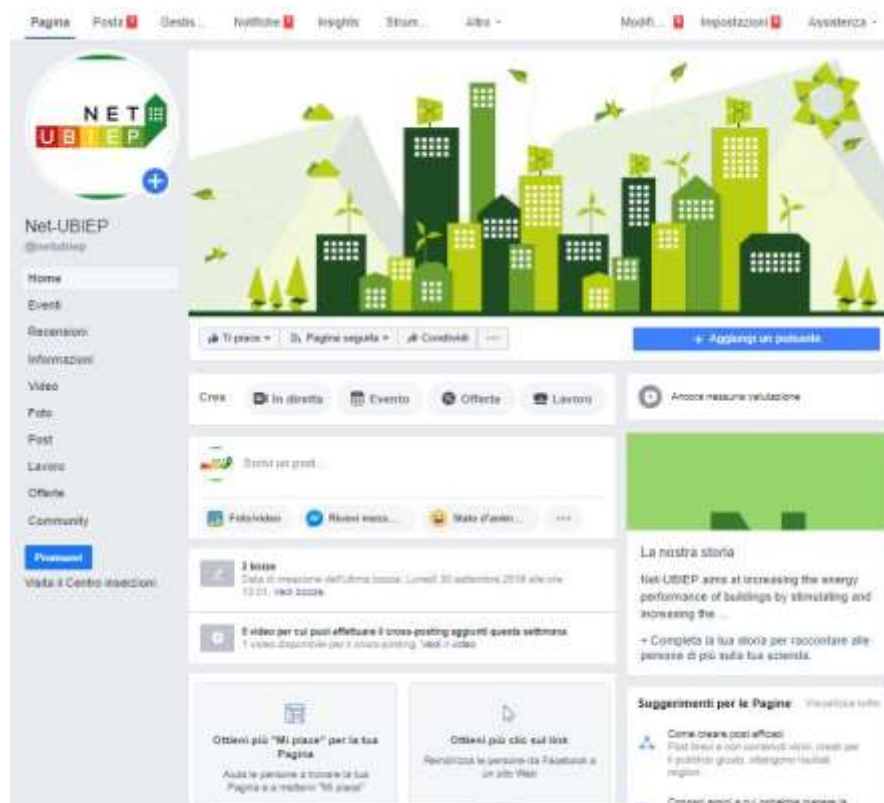

Figure 17

In December 2019, in the end of the project, Net-Ubiep Facebook page counted 97 followers and 91 likes in total.

The number of followers are increased mostly during the dissemination activities, in 2019, thank to the different events like seminars and workshop for professional and public administration organized by the partners; also 'Open Days' and Project's Conferences have contributed to dissemination activities, focused more on project results and achievements.

The tables below shows these aspects, like the post about seminars, workshops, events obtain more like and shares:

◆ LinkedIn

Italian LinkedIn page was created by the Italian partners specifically for the purposes of promoting activities and results of the Net-UBIEP project, specifically about what interesting the users of linkedin, generally professional like architects, engineers surveyors and so on.

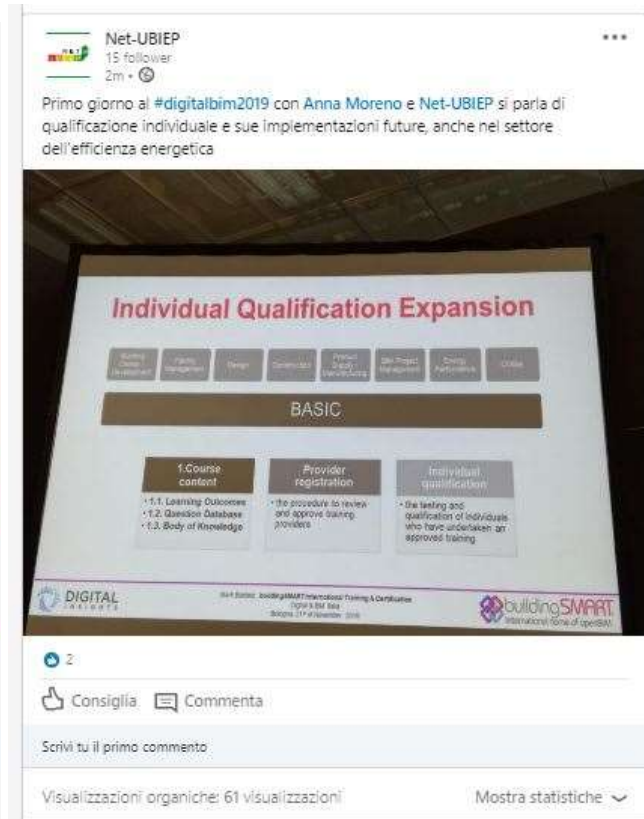

This channel used in order to give more evidence about activities like seminar and workshop organized by Italian partners specially for the professionals target.

A screenshot of the Net-UBIEP social media notification interface. The top bar shows "Net-UBIEP" and "Visualizzazione amministratore". Below it are tabs for "Pagina", "Suggerimenti di contenuti", "Analisi", and "Attività". The left sidebar is titled "Notifiche social" and includes links for "Mostra tutte", "Reazioni", "Condivisioni", "Commenti", and "Menzioni". The main content area is titled "Tutte le notifiche per Net-UBIEP" and displays four notifications. Each notification includes a profile picture, a title, a description, a thumbnail image, and a "Consigliato" (Recommended) count. The notifications are: 1. Vaidotas Šarka ha aggiunto una reazione all'aggiornamento della tua azienda (1 mese, Consigliato 1 volta). 2. Net-UBIEP e 1 altra persona hanno aggiunto una reazione all'aggiornamento della tua azienda (1 mese, Consigliato 2 volte). 3. Vaidotas Šarka ha aggiunto una reazione all'aggiornamento della tua azienda (1 mese, Consigliato 1 volta). 4. Net-UBIEP HR ha menzionato la tua azienda in un aggiornamento (1 mese, 6 reazioni).

Net-UBIEP account has achieved 15 Followers and more than 50 post published, less than the other social channels because the data showed that people followed more the facebook and twitter channels, as well as sharing and retweets, and the action focused more on these two channels .

Below a selection about post on LinkedIn:

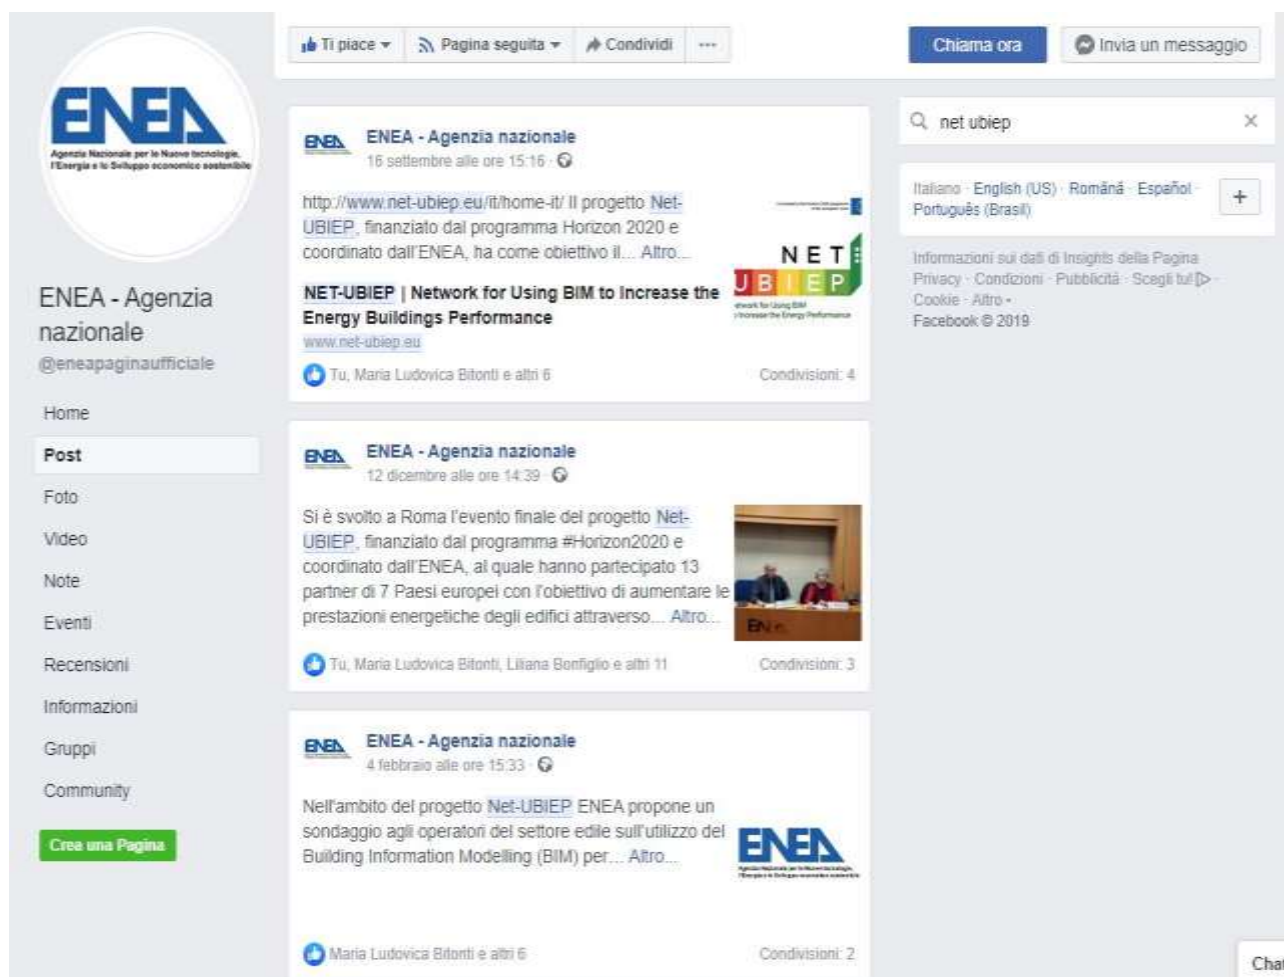

4.2.2. Social media account of the partners: ENEA & CSA

The Italians partners also used their company accounts, having an important number of followers who already follow these profiles , to give greater visibility to the events and activities of the project.

Below a selection of the most clicked posts published on the pages of ENEA and CS Aziendale:

4.3. Croatia

4.3.1. National NET-UBIEP account

National Facebook page was created specifically for the purposes of promoting activities and results of the Net-UBIEP project. The page is titled: Net-Ubiep HR and can be found also on Facebook or Messenger if one types: @netubiephr

49

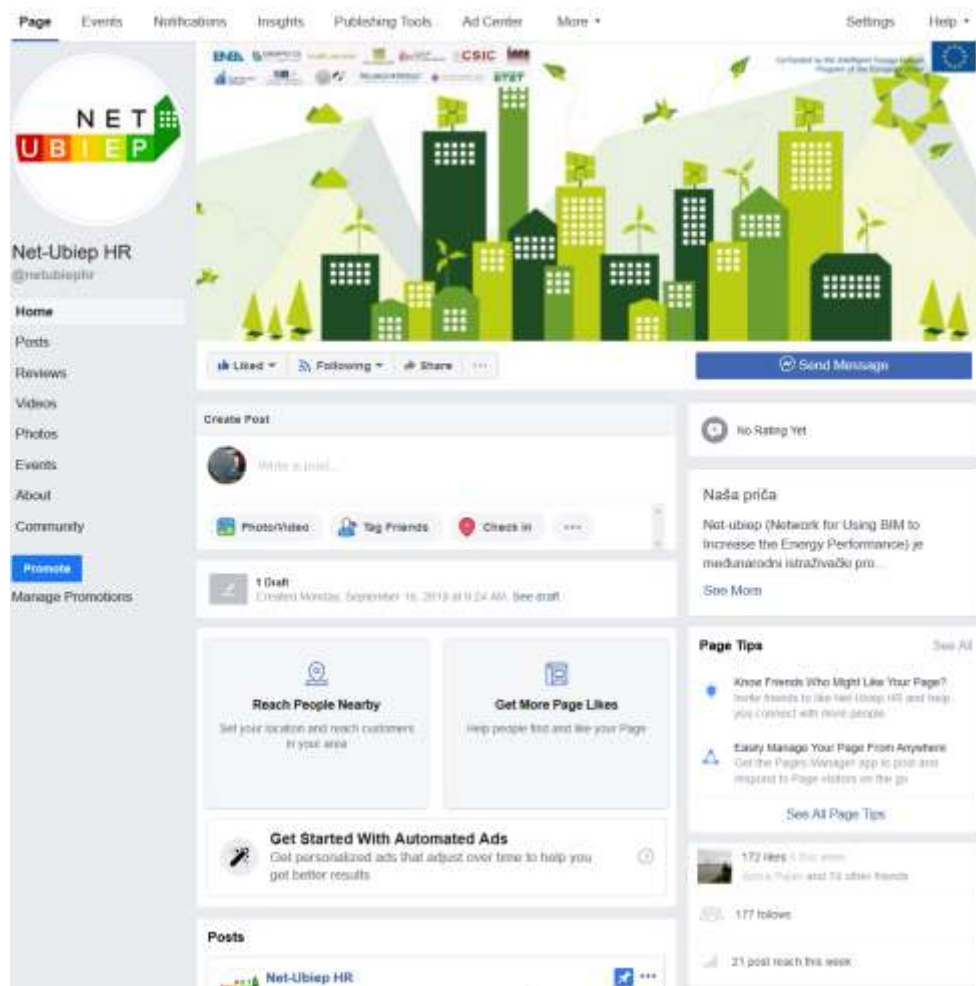

Figure 6

The Net-Ubiep HR Facebook page created community around BIM and NZEB and followed other Horizon 2020 projects related to similar topics like BIMEET, BIMCERT, BIMPLEMENT Fit-to-NZEB as well as Erasmus+ project BIMzeED. Special focus of the Net-Ubiep HR Facebook page was dissemination of project results and attracting people to project related events.

By the beginning of December 2019, Net-Ubiep HR facebook page had 181 followers and 176 likes in total. It is also evident from the graphs below that the number of followers steadily increased during the dissemination activities of the Croatian partners, especially during 2019 when majority of training activities were performed and when dissemination activities focused more on project results and achievements.

50

Since the beginning of the project till the beginning of December of 2019, Facebook page Net-UBIEP HR published in total 127 posts as shown in the print screens below which means that on average one post was published every 6.9 days (one post per week) since the beginning of the project.

As shown below, there were also some public posts on the Net-Ubiep HR Facebook page:

Net-Ubiep HR Facebook page has also shared posts published by other national Facebook pages related to the Net-UBIEP project.

Post Reach graph (the number of people who saw any of our posts at least once.) shows that Net-UBIEP HR posts reached on average 20 people if organic reach is considered with several posts which raised more interest (up to 300 people reached).

66

While if posts were paid, they reached 2552 and 4635 people, respectively, so it can be concluded that in future efforts, project budget should also consider social network adds.

The number of times the Net-Ubiep HR Facebook profile was viewed by logged and logged out people is shown below.

The number of people who saw any of Net-Ubiep HR posts at least once, grouped by age and gender as well as country of origin and city of origin. Aggregated demographic data is based on a number of factors, including age and gender information users provide in their Facebook profiles. This number is an estimate.

◆ Facebook

National Facebook page was created especially for the Net-UBIEP project to promote activities and spread its results. The page is titled as Net-Ubiep EE and can be found also as @netubiepee. Net-Ubiep EE page focused on dissemination of project results and attracting people to project related events/seminars.

78

At the beginning of December, Net-Ubiep EE page had 60 followers and 48 likes in total. It is seen from the graph below that during the project Net-Ubiep EE page had steady number of followers, but it increased rapidly at the end of 2019. This is due to high interest in project e-learning platform that was disseminated in fall 2019 as well as promoting project's second open day and other relevant outcomes of Net-UBIEP project.

79

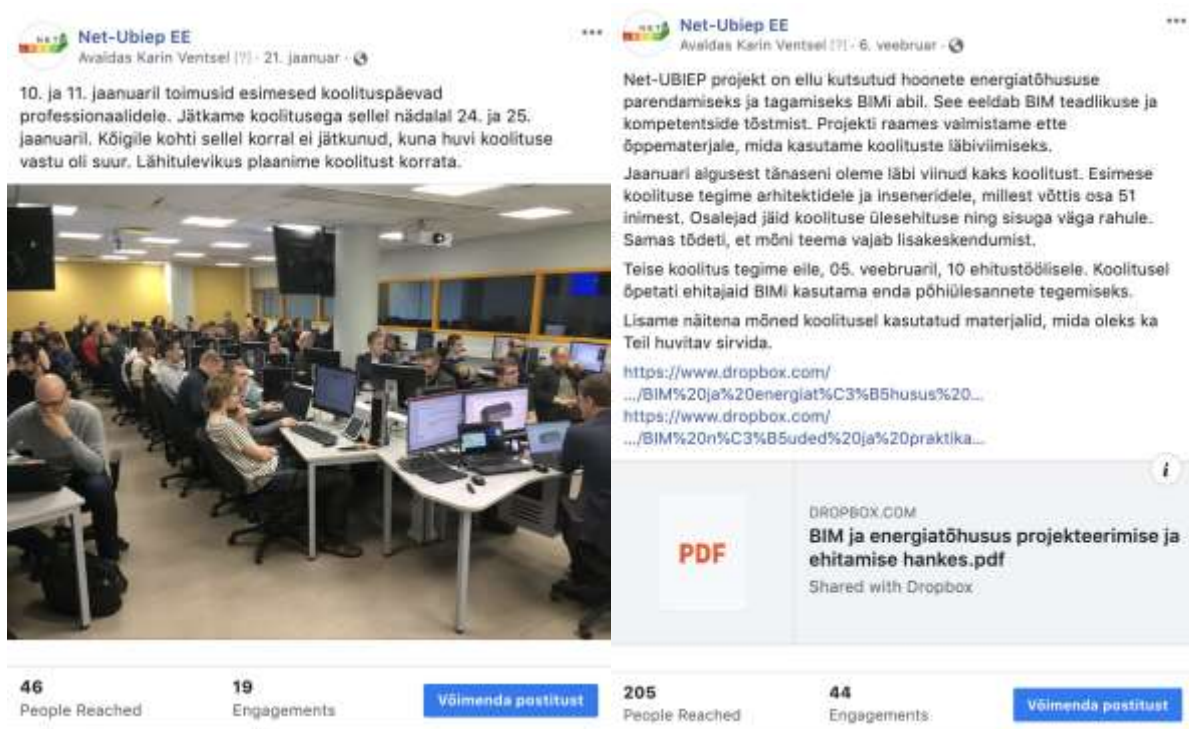

Since the beginning of the project till the beginning of December 2019, Facebook page Net-Ubiep EE published in total 45 posts as seen from the print screens below. That is 2 posts per month starting from December 2017, when this Facebook page was created.

The Net-Ubiep EE page was used also to promote Net-UBIEP events, but just as an informative post, not as a separate Facebook event.

As shown below there were also news outside the Net-UBIEP project to attract more people.

Post Reach graph (the number of people who saw any of our posts at least once) shows that Net-Ubiep EE posts reached an average of 11 people if organic reach is considered. Some posts raised more interest and reached up to 150 people.

The number of times the Net-Ubiep EE Facebook profile was viewed by logged in and logged out people is shown below.

Kutsume Teid osalema uuringus, mis käsitleb BIMi kasutamist hoonete energiatõhususe parendamiseks. Uuringu eesmärk on hinnata BIMi rakendamist energiatõhususe vallas Net-UBIEP projekti peamiste sidusrühmade seas, et mõista praegust BIMi kasutamist, selle eelseid, tõkkeid ja BIMi võimalikku kasutamist tulevikus.

Küsitlusele on oodatud vastama kõik, ka need, kellel hetkel kogemus BIMi kasutamisega puudub.

Küsitluse leiute järgmiselt lingilt endale sobiva sihtrühma alt:

Valminud on e-õppe kursus energiatõhususe ja BIMi teemal. Kursusel on kolm moodulit: esimene on sissejuhatus, mis annab ülevaate energiatõhususest ja BIMist, teine on suunatud arhitektidele ja inseneridele ning kolmas oskustööstistele.

Kursuse läbinud ja testi edukalt sooritanud arhitektid ja insenerid saavad taotleda 20 täiendkoolituspunkti. Kampania korras on esimesele 20le täiendkoolituspunktide taotlemine TASUTA.

2019 m. kovo 29 d. Vilniaus Gedimino technikos universitete įvyko Net-UBIEP projekto mokymai, skirti statybos sektoriaus projektavimo ir statybos įmonėse dirbantiems profesionalams.
Renginio pranešėjai supažindino su naujomis galimybėmis, kaip taikant statinių informacinio modeliavimo (toliau BIM) metodiką, efektyviai planuoti ir valdyti statybos projektų projektavimo ir statybos veiklas.

#VGTU dalyvauja Europos Komisijos finansuojame projekte Net-UBIEP („BIM kompetencijų tinklo energiniam efektyvumui kūrimas“). Lietuvai šiame projekte taip pat atstovauja VšĮ „Skaitmeninė statyba“. 13 partnerių iš 7 Europos valstybių (Italijos, Lietuvos, Slovakijos, Ispanijos, Nyderlandų, Estijos ir Kroatijos) kartu (tačiau pritaikant kiekvienai šaliai atskirai) rengė seminarus, pilotinius mokymus, e-mokymosi kursus ir mokymo medžiagą, kuri prisidės prie BIM kultūros, siekiant efektyvinti energijos suvartojimą pastatuose, skaičios Europoje.

Kviečiame užsiregistruoti į projekto nuotolinio mokymosi kursą, kuris skirtas išplėsti žinias apie BIM taikymą pastatų energiniam naudingumui gerinti. Kursas gali būti naudingas visiems, norintiems daugiau sužinoti apie statinio informacinio modeliavimo naudojimą.

Norėdami peržiūrėti kursą, registruokitės <http://skst.vgtu.lt/>

VGTU Statybos fakultetas

December 15 at 10:30 PM

Vilniaus Gedimino technikos universitetas dalyvauja Europos Komisijos finansuojame projekte Net-UBIEP (BIM kompetencijų žinioje energiam efektyvumui kurti). Lietuvoje šiame projekte taip pat atstovauja VGTU Statybos fakultetas.

13 partnerių iš 7 Europos valstybių (Italijos, Lietuvos, Slovakijos, Ispanijos, Nyderlandų, Estijos ir Kroatijos) kartu (tačiau pritaikant kiekvienai šaliai atskirai) rengė seminarus, pildinius mokymus, e-mokymosi kursus ir mokymo medžiagą, kuri prisidės prie BIM kultūros, sekant efektyvią energijos suvartojimą pastatuose, skaidos Europoje.

Kviečiame užsiregistruoti į projekto sukurtą nuotolinio mokymosi kursą, kuris skirtas išplėsti žinias apie BIM taikymą pastatų energiam naudingumui gerinti. Kursas gali būti naudingas visiems, norintiems daugiau sužinoti apie statinio informacinio modeliavimo naudojimą.

Norėdami peržiūrėti kursą, turite nemokamai registruotis čia: skst.vgtu.lt
